USB Type-C Charging Port

Left Button

2.4G Receiver Storage

* Adjustable by Software: 100~12,000 CPI

CONNECTING 2.4G DEVICE

① Connect to the Desktop Computer

Connect the extension dock to the host computer, and plug the nano receiver into the extension cord. Place it in front of the mouse, with no obstructions between it.

② Connect to the Laptop Computer

Connect the nano receiver to the laptop computer with no obstructions between the mouse.

CONNECTING USB WIRED

The mouse switches from wireless mode to wired mode when the USB Type-C cable is plugged in.
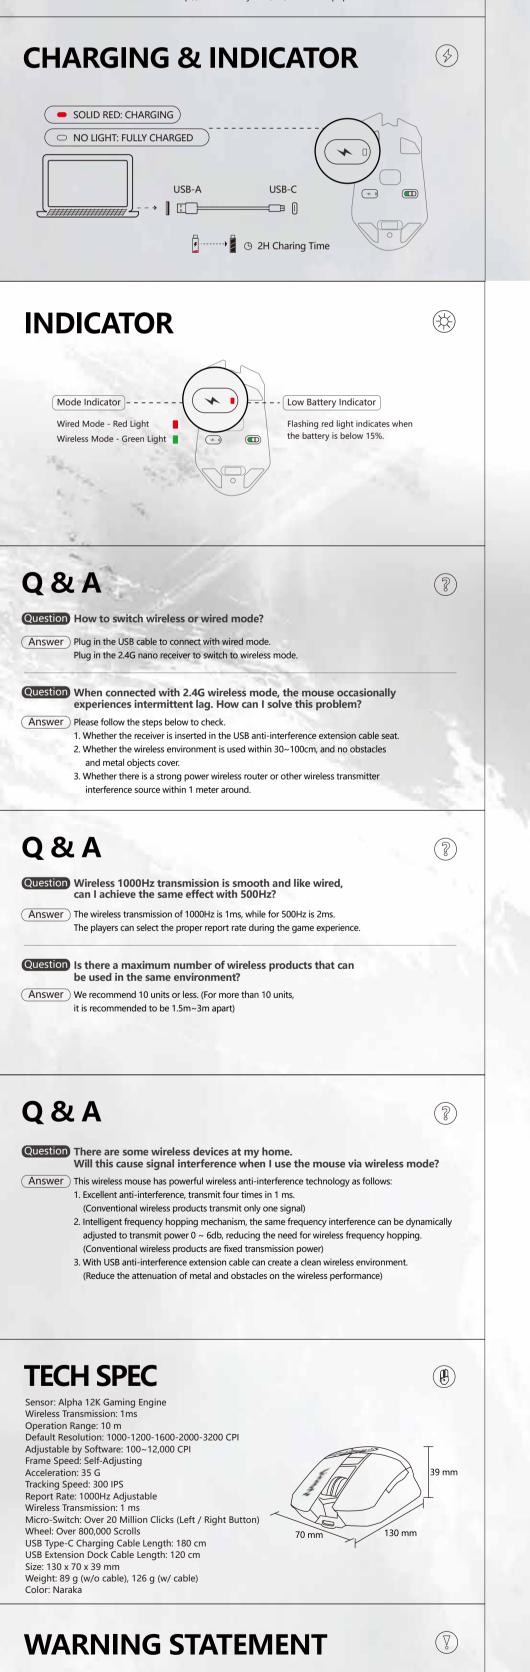

Connect to the Desktop Computer

Connect to the Laptop Computer

WIRELESS M-ESPORT EDITOR

Provide the mouse with simple combination settings and programming functions. Players can optimize the most suitable game configuration by buttons, sensitivity, and combination macros, then save it to the mouse on-board memory.

CHARGING & INDICATOR

SOLID RED: CHARGING
NO LIGHT: FULLY CHARGED

USB-A   USB-C

2H Charing Time

INDICATOR

Mode Indicator
Wired Mode - Red Light
Wireless Mode - Green Light

Low Battery Indicator
Flashing red light indicates when the battery is below 15%.

Q & A

Question How to switch wireless or wired mode?
Answer Plug in the USB cable to connect with wired mode.
Plug in the 2.4G nano receiver to switch to wireless mode.

Question When connected with 2.4G wireless mode, the mouse occasionally experiences intermittent lag. How can I solve this problem?
Answer Please follow the steps below to check.
1. Whether the receiver is inserted in the USB anti-interference extension cable seat.
2. Whether the wireless environment is used within 30~100cm, and no obstacles and metal objects cover.
3. Whether there is a strong power wireless router or other wireless transmitter interference source within 1 meter around.

Q & A

Question Wireless 1000Hz transmission is smooth and like wired, can I achieve the same effect with 500Hz?
Answer The wireless transmission of 1000Hz is 1ms, while for 500Hz is 2ms.
The players can select the proper report rate during the game experience.

Question Is there a maximum number of wireless products that can be used in the same environment?
Answer We recommend 10 units or less. (For more than 10 units, it is recommended to be 1.5m~3m apart)

Q & A

Question There are some wireless devices at my home. Will this cause signal interference when I use the mouse via wireless mode?
Answer This wireless mouse has powerful wireless anti-interference technology as follows:
1. Excellent anti-interference, transmit four times in 1 ms. (Conventional wireless products transmit only one signal)
2. Intelligent frequency hopping mechanism, the same frequency interference can be dynamically adjusted to transmit power 0 ~ 6db, reducing the need for wireless frequency hopping. (Conventional wireless products are fixed transmission power)
3. With USB anti-interference extension cable can create a clean wireless environment. (Reduce the attenuation of metal and obstacles on the wireless performance)

TECH SPEC

Sensor: Alpha 12K Gaming Engine
Wireless Transmission: 1ms
Operation Range: 10 m
Default Resolution: 1000-1200-1600-2000-3200 CPI
Adjustable by Software: 100~12,000 CPI
Frame Speed: Self-Adjusting
Acceleration: 35 G
Tracking Speed: 300 IPS
Report Rate: 1000Hz Adjustable
Wireless Transmission: 1 ms
Micro-Switch: Over 20 Million Clicks (Left / Right Button)
Wheel: Over 800,000 Scrolls
USB Type-C Charging Cable Length: 180 cm
USB Extension Dock Cable Length: 120 cm
Size: 130 x 70 x 39 mm
Weight: 89 g (w/o cable), 126 g (w/ cable)
Color: Naraka

39 mm
70 mm   130 mm

WARNING STATEMENT

The following actions may/will cause damages to the product.
1. To disassemble, bump, crush, or throwing into fire, you may cause irrefutable damages in event of the lithium battery leakage.
2. Do not expose under the strong sunlight.
3. Please obey all local laws when discarding the batteries, if possible please recycle it. Do not dispose it as household garbage, it may cause a fire or an explosion.
4. Please try to avoid charging in the environment below 0°C.
5. Do not remove or replace the battery.
6. Forbidden to use 6V to 24V charger, otherwise the product will be burned. Recommended to use a 5V charger for charging.
